

IF YOU THINK YOU SMELL GAS IN YOUR HOME . . .

FOLLOW THESE IMPORTANT SAFETY PROCEDURES

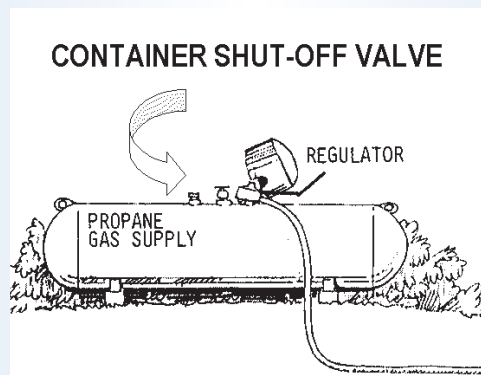

Consolidated Gas knows the safety of you and your family come first. That's why we perform a GAS Check® (gas appliance system check) when a tank is installed or if you run out of propane. We don't take chances with your safety!

1 Leave your home immediately.

Do not light a match, touch electrical switches or use your phone. Get everyone outside and away from the building.

2 Shut off the gas supply at the tank. Know the location of the main shut-off valve on the tank. Become familiar with how to shut it off in an emergency situation.

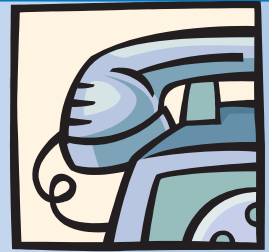

3 Call Consolidated Gas Co-op from a neighbor's phone or from a cellular phone. Our 24-hour emergency number is:

(866) 946-6600

If you cannot reach us, call the fire department.

4 Stay outside your home until a Consolidated Gas representative arrives and the leak has been fixed.

5 Have a Consolidated Gas or other qualified technician relight your gas appliances for you. Don't take chances with your safety or that of your family.

IF YOU RUN OUT OF PROPANE

- 1. Turn off the control valves on all gas appliances.**
- 2. Turn off the shut-off valve on the propane tank.**
- 3. Call Consolidated Gas to arrange for delivery.** Be sure to tell us that you have run out of propane.
- 4. Don't turn the gas back on yourself.** Let Consolidated Gas do it. They will do a GAS Check® (gas appliance system check) to make sure your appliances and system are operating properly and are leak free.

CAUTION: A pilot light is a safety device. If you have trouble keeping it lit, you may have a problem that will need a service technician to correct.

Consolidated Gas is proud to be one of the family of subsidiary companies of Consolidated Electric Cooperative, Inc.

As a nonprofit metered propane cooperative, our main focus is serving the needs of our members – serving you!
